KLP[®] Fencing

KLP[®] Poles and **KLP[®] Planks** are ideally suited for constructing fences. By choosing our products you choose a sustainable and maintenance free solution at the same time as it will last for many years without you having to look after it.

The material is coloured throughout, is frost and UV resistant, will last several decades and looks completely at home in the country-side, cities and parks.

The material does not rot nor splinter, it is very strong and it has an expected technical lifetime of at least 50 years. After years of sunshine, rain and frost the construction of KLP[®] will remain as good as new.

Furthermore the material is easy to clean and does not require maintenance. Valuable savings are calculated over the entire technical lifespan - not only time, but also money.

KLP[®] products contribute to a cleaner environment; they are made from 100% recycled plastics and are not chemically treated in any way, therefore will not leach poisonous substances to the environment. Through recycling we can utilise waste streams such as car bumpers, crates, agricultural plastic, bottle caps, etc. to a higher quality application.

Lankhorst knows how to get to the best results when constructing with KLP[®] and will gladly be of help to give you mounting instructions and some good advice on fixing the material.

Durable & Environmentally friendly
